# SUKKAH EMMANUEL KOFI ARIEL

**FULL-STACK SOFTWARE ENGINEER | BACKEND SYSTEMS | CLOUD PLATFORMS**

Accra, Ghana | +233 24 150 3527 | sukahemmanuelkofi@gmail.com

## PROFESSIONAL SUMMARY

Software engineer with engineering experience dating to 2017, building, debugging and deploying web, mobile and backend applications. Hands-on experience with TypeScript, JavaScript, React, Node.js, PostgreSQL, Firebase and Cloudflare; practical work spans authenticated APIs, database-backed operational platforms, e-commerce workflows, automated testing and production troubleshooting. Combines software delivery with networking, technical operations and STEM education experience. Based in Ghana and available for remote software engineering opportunities.

## TECHNICAL SKILLS

**Programming & frontend:** JavaScript, TypeScript, SQL, React, Next.js, React Native, Expo, HTML, CSS

**Backend & databases:** Node.js, Express, Fastify, REST APIs, WebSockets, Prisma, PostgreSQL, MongoDB, Redis, Firebase/Firestore

**Cloud & delivery:** Cloudflare Workers, D1, R2, Hyperdrive, Supabase, Render, Docker, Git/GitHub, CI/CD, Linux

**Security & engineering:** JWT, role-based access control (RBAC), request validation, authentication, authorization, API protection, debugging, automated testing, root-cause analysis

## PROFESSIONAL EXPERIENCE

**MERNORAH TECHNOLOGY | Software Engineer | Accra, Ghana | 2020–2026 | Remote**

- Led hands-on development of internal and client-facing software, including web interfaces, backend APIs, data models, operational workflows and cloud integrations.
- Investigated application and deployment defects; implemented authentication, authorization, validation, testing and technical fixes across project lifecycles.
- Coordinated requirements discovery, implementation, deployment and client-facing technical communication.

**Network Engineer & Administrator** | Networld Creative Technology / CRENET GLOBAL | Ho, Ghana | 2026

- Configured and troubleshot MikroTik, Cambium, Ubiquiti, TP-Link Omada and Starlink installations in customer environments.
- Diagnosed LAN/WAN, DHCP, wireless connectivity and captive-portal faults; supported technical operations and issue resolution.

**STEM Educator** | CODABOT GH | Ghana

- Facilitated practical STEM learning, guiding learners through technical exercises and structured problem-solving.
- Explained complex technical concepts in accessible language and supported hands-on learning activities.

## SELECTED SOFTWARE ENGINEERING PROJECTS

**MERNORAHFLOW | Business Operations Platform**

*TypeScript | Fastify | Prisma | PostgreSQL | Redis | Cloudflare Workers | Supabase*

- Engineered workspace-aware data and API workflows for relationships, projects, billing and support, backed by PostgreSQL and Prisma.
- Diagnosed application and deployment defects; deployed a Cloudflare Worker API connected to hosted PostgreSQL.

**SecureGate | Reusable Authentication & Authorization Components**

*TypeScript | Node.js | Express | JWT | RBAC | Automated Tests*

- Created reusable token validation, route-protection and permission-aware middleware for Node.js APIs.
- Implemented tests around unauthorized requests, restricted endpoints and authentication failure paths.

**Roxzy Bakery & Catering | Customer Website & Operations Backend**

*Cloudflare Workers | D1 | R2 | Authentication | Rate Limiting*

- Developed and deployed a customer-facing web platform with structured enquiries, Cloudflare D1 persistence and R2 media storage.
- Worked on staff authentication, API request protections, operational workflows and production troubleshooting.

**FarmArt | Agricultural Mobile Marketplace**

*React Native | Expo | Firebase | Firestore | Cloud Functions | Paystack*

- Developed farmer and buyer workflows covering product listings, inventory-aware ordering, checkout and transaction history.
- Integrated backend payment verification and supported offline-aware app behavior and database security rules.

**RetailCore | Inventory, Sales & Business Operations**

*React | Node.js | Express | PostgreSQL | MongoDB | Redis*

- Developed authenticated inventory, product, sales, stock-movement and reporting workflows with protected backend APIs.
- Implemented stock validation, inventory adjustments, structured API errors and sales history logic.

## ADDITIONAL ENGINEERING WORK

**Hope Hills Missions** - Built website features and tested Cloudflare D1-backed form submission and data persistence workflows.

**NetPulse** - Designed a modular network-monitoring system covering device inventory, incidents, authorization and WebSocket updates.

**Innovartus SaaS / APK-SaaS** - Configured GitHub-to-Render deployment and verified application release and HTTPS access.

**Responsive website engineering** - Implemented service pages, responsive navigation, mobile layouts and cloud/domain configuration.

## EDUCATION

**Bachelor of Technology (BTech), Information Technology** | Ho Technical University, Ghana | 2026

## RELEVANT SECURITY DEVELOPMENT

Forage virtual job simulations (2025): Mastercard - phishing/security awareness; Tata Consultancy Services - identity and access management (IAM) and security architecture; Datacom - security incident investigation and OSINT.
